Grand Hop—F. Orient, Secy.
Girl Wants—A. M. Oatman.
M. & E. Union—J. H. Davison, President.
Agents Wanted—Aero Goff, Erie, Pa.

Varieties.

Yankee Robinson's Circus will exhibit in Titusville July 10th.

The celebration committee will meet at the Council room this evening at eight o'clock.

John A. Karow, the Assessor of this District, was in town yesterday. His office is at Greenville, Mercer county.

Hon John Coyote has been appointed Chairman of the Republican State Central Committee, and M. S. Quay, Esq., of the Beaver Republican, Secretary.

It will be seen by an advertisement that there is to be a Grand Hop at Corinthian Hall on the evening of July 5th for the benefit of the Hook and Ladder Company.

Prof. Thurston arrived yesterday afternoon with his balloon. It will be inflated this morning between seven and nine o'clock, at the intersection of Pine and Spring streets.

The State Convention of Harangua was held at Philadelphia on Monday, with a view to uniting the two Grand Lodges of the State, in accordance with a resolution passed by a Convention of all the lodges of the United States.

M. D. Williams, a railroad ticket agent of Buffalo, accompanied with some two thousand dollars belonging to different roads. He took passage on the Lake Shore road for Erie, and is supposed to be making tracks for California.

Prof. Thurston arrived in this city last evening with his monster balloon, "Bridal Charlot," and will exhibit it at the Driving Park to day and give all his aerial passengers a most magnificent view of the Oil Regions from an elevation of one thousand feet.

Mr. H. F. Sweetser returned on Saturday last from his trip to San Francisco over the Union Pacific Railroad. He gives very favorable accounts of the condition of the road. The travel is not yet extensive, but is steadily increasing, the trains now carrying about 300 passengers each way.

This is the first day of the trotting fair, and those feeling interested in the exhibition will consult the programme. There is a liberal list of premiums and with a good day there will be a large attendance. Prof. Thurston will be on the track with his balloon, and will carry small parties up for a consideration. The balloon will be firmly anchored, and the aeronauts can be readily reached to suit the inclination.

The great Pie No at Chautauqua Lake takes place to-day, and if the weather proves favorable it will be very numerously attended. Trains on the Cross Cut Railroad run for half fare, and the steamboats on the Lake also carry excursionists at reduced rates. Fair Point is the rendezvous, an attractive place for a picnic as could be desired. The Titusville delegation have engaged the services of a brass band, who will escort them to the depot this morning at 7 o'clock.

The Trades Procession.

The following trades will be represented on the Sub. Any other who wish to join in will please report to the Committee on Procession, or J. J. McCrum, or before Saturday noon, so that they may be assigned their proper place in the procession: J. J. McCrum, Harness, &c.; Enoch & Co. Brewery; Coburn & Co., Tapers; J. McCullough, Carpet Weaver; M. B. McManus, Bell Ringers; Bryan, Dillingham & Co., Engine and Boiler; Blase Brothers & Coghill, Printing office; H. M. Hall, fruit stand; M. A. McDonald, drug store; J. H. Whalon, boot and shoe store; E. J. Ross, cigar store; W. W. Russ, furniture store and carpet; Funk, Jackson & Fuller, dry goods; B. H. Nard, stationer; Angier Brothers, bakers; O. E. Parsons, dairy; Smith & Hinckley, hardware store; J. W. Ester, variety store; R. D. Fletcher & Co., dry goods store; E. T. Hall, sewing machine agency; Clark, Hays & Co., grocery; R. T. Hazzard, dry goods; B. J. Nuse, jeweler; Straus & Stettheimer, merchant tailors; F. Wyland, pop works; Castile & Co., carriage shop; Thompson & Hilton, druggists, etc.; D. Harris & Co., dry goods; Silas Kene, blacksmith shop; Western Union Telegraph Co.

Many other occupations will doubtless be represented, and it is believed this feature of the demonstration will be an improvement upon that of last year. But a few days remain in which to complete the preparations for the celebration and it is hoped that all who feel an interest in its success will spare no effort to contribute to that result.

An adjourned meeting of the committee of arrangements will be held at the Common Council room this evening.

CITY BONDS.—The coupons due on the City Bonds to-day will be paid on presentation to the City Treasurer.

G. S. STUART,
Chairman Finance Committee.

FRESH vegetables and small fruits, beets, asparagus, cucumbers, berries, received daily by express, at Sherrill's, 27 Franklin street, near the New York Market.

RETURN JUDGES CONVENTION.

The Return Judges of the Republican Primary Meeting met at Meadville on Tuesday, and organized by appointing Mr. L. C. Beach, of Meadville, Chairman, and Mr. E. Montague, of Conneautville, and Mr. F. Pace, of Titusville, Secretaries. Mr. Beach made a speech on taking the chair, and the Convention proceeded to business. The list of districts was then called and the Judges reported with returns. Messrs. James Ewing and T. R. Kennedy were appointed Tellers.

The ticket nominated is as follows:

Assembly—Henry C. Johnson, F. W. Ames.

Sheriff—F. W. Ellsworth.

Prothonotary—H. C. Brocka.

Treasurer—J. L. Lamb.

Regulated and Recorder—A. M. Smith.

District Attorney—J. W. Smith.

Clerk of the Courts—A. J. McQuiston.

Commissioner—D. A. Bennett.

Auditor—J. E. Ford.

Surveyor—Thomas Van Horn.

Coroner—Thomas E. Curtis.

THE WEATHER and the CROPS.

Nature plays queer tricks about these days, and "the oldest inhabitant" never saw so much rainy weather. The same venerable individual was equally surprised last summer, when the grass withered and the earth parched, with drought, and men fell by sun stroke in the streets. A day of blue sky and sunshine is succeeded by a horizon filled with clouds, tossed and driven by the wind, then it dizzies, and then it ruts and then pours.

In some parts of the country we read of hurricanes unroofing houses, and uprooting trees, in others of swollen streams, sweeping away bridges, and undermining embankments. We had just been rejoicing in the rich agricultural prospects of the year, but unless we have a cessation of rain, the crops must suffer, and values will be greatly affected.

Farmers can't hoe wet, sloppy ground; the corn looks poor, as the season has been cold; the weeds grow apace; the growth is less in the berry than in the vine while the wind blows down and drags so as materially to interfere with harvesting. The liability to rust when hot weather comes is very great. The Chileno "Tierra" says:

The continuation of the stormy weather might cause such a depreciation of the crop of winter wheat, as to make the most favorable harvest in the northern latitudes, where spring wheat is mainly grown, could not possibly supply the deficiency and restore the yield of wheat to its average amount. In short, the season has now reached a point full of peril and danger to our agricultural staples. No real protection can be derived from discussing the question, as the condition of the crop varies with every farm, owing to the time of planting, the nature of the soil, and the character of the climate, and may be entirely determined by the occurrence of storms to which we are now exposed; or by a brief period of pleasant weather, for which it does not seem unreasonable to hope at this season of the year. Everything depends upon the future, and no one can form even an intelligent estimate of the results—till grain men begin canvassing all the pros and cons of the situation, and especially those with each grain, and such surrounding circumstances as may affect the market.
